Sample career: Paralegal

TO BOOKS DELIVERED TO YOUR MAILBOX
As a student in an Ivy Tech Community College online program, you won’t have to visit campus to buy your books. Thanks to Ivy Tech’s Distance Education Bookstore, a virtual bookstore designed just for you, you can order textbooks and software from home, on your own schedule. Books are delivered to your mailbox, with orders placed by noon processed and shipped the same day.

IVY TECH’S ONLINE AND DISTANCE EDUCATION OPTIONS
Today’s learning environment isn’t surrounded by walls. Thanks to technology, education is available to you where you need it, when you need it. There are no limitations—only possibilities.
That’s the idea behind the online and distance education programs available from Ivy Tech Community College. You can study on your own schedule, allowing you to balance your family and work obligations and still make time for a college degree. We offer ten programs that can be completed online, and one that is available via two-way video. You can take classes from home or work—or anywhere else while still enjoying interaction with other students and learning from the same qualified instructors who teach classes on campus.

To enroll in an online program, you’ll need a computer with an Internet connection. Some courses may require specific software, and you may need to come to campus to take a proctored exam, participate in a laboratory session, or take a practicum or internship—but the vast majority of your work will be completed online. Also, you may need to take greater responsibility for your own learning since online education requires you to be disciplined about studying and completing assignments. However, you’ll get the same level of personal attention and support that you would receive on campus.

At Ivy Tech, your future is just a mouse click away. To learn more, or to take a short survey to see if distance education is right for you, visit www.ivytech.edu.

Ivy Tech offers degrees that lead to good paying jobs in the fields where workers are needed most.

Ivy Tech offers the most affordable tuition in Indiana. For online courses, Indiana residents pay approximately $300 for each 3-credit class*. For a full-time student, the average annual tuition cost is $2,739—a fraction of the cost of other public, private, and online colleges and universities.

Credits from Ivy Tech transfer to four-year colleges and universities.

Ivy Tech is the fastest-growing college in the state and the largest community college of its kind in the U.S.

*Out-of-state tuition is approximately $400 for each 3-credit online class. Tuition costs do not include books. Book fees vary but the average is $500 per semester.
