Want to get into Information Technology, but don’t know where to start? CompTIA’s A+ Certification is often considered the industry’s entry point for PC technicians. This 60 hour course will teach you how to install and maintain PC hardware and software. You will learn about system hardware components, their function, and what to do when failures occur. You will also learn about operating systems and how to maintain them. Gain valuable experience installing the Windows system and learn how to recognize and correct common operating system errors.

For more information on A+ certification, please visit www.comptia.org.

**Benefits to Your Organization**

- Learn how to fix common hardware errors, reducing computer down-time, and costly repair calls
- Professional credential ensures your staff have the skills needed to troubleshoot, setup, and maintain PC hardware and software
- Increase self-confidence in addressing PC issues, taking the ‘guess-work’ out of fixing a problem

**Course Objectives**

- Prepare students for the CompTIA A+ certification exams
- Perform installation, repair, maintenance, and configuration of computer system components
- Use concepts and functions necessary to upgrade and troubleshoot computer systems
- Understand the real-world implications of the A+ objectives
- Understand certification options to help choose appropriate certification track

**Training Description and Materials**

This course is held in a hands-on computer lab environment. The first night of class, students will be assigned a PC to perform lab exercises such as: identifying system components, troubleshooting malfunctions, and building/rebuilding the machine. Quizzes, handouts, and other study-aids are incorporated throughout the course.

This course can be held at your location or in one of our state of the art computer labs.

**Hours and Cost**

Your CompTIA A+ training course includes 60 contact hours for up to 6 employees. Pricing includes training administration, instruction, all classroom materials, exam vouchers, and an activity evaluation at the conclusion of training.

Suggested Retail Price: $6,999
(Additional participants may be available at an additional cost)
