Ivy Tech Foundation was founded by far-sighted leaders who recognized the College’s valuable role in providing accessible, quality higher education at the regional level.

Foundation funding is focused on the areas of:
- Scholarship aid to students
- Faculty development
- Instructional equipment
- Special activities
- General endowment
- Capital improvements

To continue to provide access to education and quality educational opportunities, financial support is sought through special gifts and estate plan provisions. To this end, endowments may be established to honor or perpetuate a family name. Endowments may exist to fund general scholarships or can be more narrowly focused in a specified program area.

In addition to a named scholarship, opportunities exist to perpetuate Ivy Tech Foundation through an estate plan gift. These include a specific provision by will, a gift of property with life estate reserved, the creation of a charitable trust, or an assignment of life insurance.

In most cases, planned gifts increase the donor’s expendable income and carry estate tax advantages. More importantly, a planned gift creates an unending legacy of opportunity for students.
Each year a significant amount of scholarship funding is available to Ivy Tech Community College students through Ivy Tech Foundation. Scholarships range from those which are based on academic ability or geographic region, to those that focus on specific programs. New and returning full- and part-time students are encouraged to apply.

The majority of scholarships are for tuition, fees, books, and required supplies.

**GENERAL REQUIREMENTS**

- Applicants must have a current Admissions Application on file at Ivy Tech Columbus campus. (Students who have not attended classes for two or more years must submit a new application.)

- Applicants must meet minimum GPA requirements where stipulated. Grade point averages (GPAs) are based on a 4.0 scale.

- Scholarships are intended for use at the Columbus campus of Ivy Tech Community College and its sites in Franklin, Greensburg, Nashville, North Vernon, and Seymour, and are not transferable to other regions or institutions.

- Any unused Foundation scholarship monies will revert to the Foundation to be re-awarded to future deserving students.

- All scholarships have specific guidelines regarding usage of the funds. If a student receives a scholarship but is already receiving similar funding, then the scholarship award may be rescinded.

- Student must be enrolled for at least six credit hours.

**APPLICATION INSTRUCTIONS:**

- Complete a FAFSA (Free Application for Federal Student Aid).

- Scholarship applications and supporting materials must be received by the Ivy Tech - Columbus campus Financial Aid Office by June 13, 2008.

- Complete application forms must have the appropriate supporting materials, including an essay, attached. Applications lacking required materials will not be considered.

- Award amounts vary for each scholarship and will be disclosed to the student when he/she receives an award letter from Ivy Tech Foundation.

- Scholarships require a new application each academic year but not each semester.

- Carefully review each scholarship to note which scholarships you may be eligible to receive.

At times additional scholarship monies may become available after the application deadline. Your application will be retained, even if you do not receive an initial reward, and considered for these as appropriate.

Scholarship selection is made by a committee comprised of Ivy Tech Community College - Columbus faculty from varying disciplines and staff, including representation from Ivy Tech Foundation.

All applications will be given equal consideration.

INFORMATION SECURITY

Identity theft. Information Breaches. Network Intrusions. They’re not just buzzwords. They’re real problems that increase with technological advances.

Be a part of the solution. Learn how to protect critical data and help companies take security measures that will safeguard them from hackers and employee errors.

Ivy Tech - Columbus is now offering an Associate of Applied Science Degree in Information Security. This exciting new program prepares students to work in the challenging area of cyber and data security by providing hands on experience in assessing vulnerabilities and implementing protective measures for today’s organizations.

The degree program offers the student practical experience in a broad spectrum of tools and technologies used to secure networks and data.

AGRICULTURE

This new program offers students hands-on agriculture experience and knowledge through classroom, laboratory and field trip activities in a small class size environment with highly educated and experience instructors in a variety of agricultural disciplines.

Ivy Tech - Columbus is offering two degree programs. Credits earned for the Associate of Science (AS) in Agriculture degree program transfer into the Bachelor of Science in Agriculture program at Purdue University. The Associate of Applied Science is offered to those students planning to enter the workforce after graduation.

A supervised agriculture internship allows students to apply concepts learned in the classroom while developing connections within the agriculture industry.
